

Create a complete, production-ready UI/UX design system and responsive web application for a social media boosting platform called:

BOOSTX

IMPORTANT DESIGN INSTRUCTION:

Use the attached reference image ONLY as inspiration for the layout structure, dashboard hierarchy, spacing, sidebar navigation, statistic cards, analytics sections, tables, and overall SaaS dashboard composition.

- DO NOT COPY THE REFERENCE DESIGN.
- DO NOT COPY ITS LOGO.
- DO NOT COPY ITS BRANDING.
- DO NOT COPY ITS TEXT.
- DO NOT COPY ITS NUMBERS.
- DO NOT COPY ITS ICONS EXACTLY.
- DO NOT COPY ITS COLORS.

Create an ORIGINAL BoostX interface.

=====

1. BOOSTX BRAND IDENTITY

=====

Brand name:
BoostX

Brand type:
Social Media Boosting / Social Media Marketing Platform

Primary purpose:
Users should be able to purchase social media services such as:

- Followers
- Likes
- Views
- Comments
- Shares
- Saves
- Engagement
- Other supported social media services

The platform is designed primarily for customers in Ghana.

PRIMARY CURRENCY:
GHS / Ghana Cedi

Examples:
GHS 10.00
GHS 25.00
GHS 100.00
GHS 1,000.00

Do NOT use USD as the default currency.

=====

2. ABSOLUTE COLOR RULE

=====

THE ENTIRE BOOSTX UI MUST USE ONLY:

BLACK
WHITE
GRAY
NEUTRAL GRAYSCALE

NO OTHER COLORS.

DO NOT INTRODUCE:

- Green
- Orange
- Blue
- Purple
- Yellow
- Pink
- Red
- Cyan
- Teal
- Gradient colors
- Colorful illustrations

Even notifications, charts, buttons, badges, icons, graphs and alerts must remain within the

black/white/grayscale system.

The only visual variation should come from:

- Black
- White
- Light gray
- Medium gray
- Dark gray
- Opacity
- Borders
- Shadows
- Typography weight

=====

3. EXACT COLOR TOKENS

=====

Create a complete color system using these tokens.

GLOBAL COLORS

Pure Black:
#000000

Near Black:
#050505

Darkest Surface:
#0A0A0A

Dark Surface:
#111111

Dark Gray:
#171717

Gray 900:
#1F1F1F

Gray 800:
#262626

Gray 700:
#404040

Gray 600:
#525252

Gray 500:
#737373

Gray 400:
#A3A3A3

Gray 300:
#D4D4D4

Gray 200:
#E5E5E5

Gray 100:
#F5F5F5

Gray 50:
#FAFAFA

Pure White:
#FFFFFF

Use these colors consistently throughout the entire design.

=====

4. LIGHT MODE

=====

The default Light Mode should feel extremely clean and premium.

LIGHT MODE:

Main background:

#F7F7F7

Primary surface/cards:

#FFFFFF

Secondary surface:

#FAFAFA

Sidebar:

#FFFFFF

Top navigation:

#FFFFFF

Primary text:

#111111

Secondary text:

#525252

Muted text:

#737373

Disabled text:

#A3A3A3

Primary button:

#000000

Primary button text:

#FFFFFF

Secondary button:

#FFFFFF

Secondary button text:

#000000

Secondary button border:

#D4D4D4

Card border:

#E5E5E5

Input background:

#FFFFFF

Input border:

#D4D4D4

Input text:

#111111

Placeholder:

#A3A3A3

Divider:

#E5E5E5

Hover background:

#F5F5F5

Selected background:

#E5E5E5

Active navigation background:

#111111

Active navigation text:

#FFFFFF

Inactive navigation text:

#525252

Chart:

#000000

Chart secondary line:

#737373

Chart grid:

#E5E5E5

=====

5. DARK MODE

=====

Create a complete Dark Mode.

Do NOT simply invert the colors.

Dark Mode should feel premium and carefully designed.

DARK MODE:

Main background:

#050505

Primary surface/cards:

#0A0A0A

Secondary surface:

#111111

Sidebar:

#050505

Top navigation:

#050505

Primary text:

#FFFFFF

Secondary text:

#D4D4D4

Muted text:

#A3A3A3

Disabled text:

#737373

Primary button:

#FFFFFF

Primary button text:

#000000

Secondary button:

#111111

Secondary button text:

#FFFFFF

Secondary button border:

#404040

Card border:

#262626

Input background:

#111111

Input border:

#404040

Input text:

#FFFFFF

Placeholder:

#737373

Divider:

#262626

Hover background:

#171717

Selected background:

#262626

Active navigation background:

#FFFFFF

Active navigation text:
#000000

Inactive navigation text:
#A3A3A3

Chart:
#FFFFFF

Chart secondary line:
#A3A3A3

Chart grid:
#262626

=====

6. LIGHT/DARK MODE SWITCH

=====

Add a clear theme switcher.

Location:
Top-right of the dashboard.

Use:
Sun icon
Moon icon

Light Mode:
Show a black/gray sun icon.

Dark Mode:
Show a white/gray moon icon.

The switch must smoothly change:

- Background
- Cards
- Sidebar
- Text
- Borders
- Inputs

- Tables
- Charts
- Buttons
- Modals
- Dropdowns
- Notifications

Do not leave any component with the wrong theme.

Persist the selected theme.

=====

7. TYPOGRAPHY

=====

Use a modern clean sans-serif font.

Preferred:
Inter

Alternative:
Manrope

Use strong typography hierarchy.

Page title:
28–32px
Weight 600–700

Section title:
18–22px
Weight 600

Card title:
14–16px
Weight 500–600

Large statistic:
28–36px
Weight 600–700

Body:
14–16px

Small text:
12–13px

Navigation:
14–15px

Button:
14–15px
Weight 500–600

Avoid overly decorative fonts.

=====

8. GENERAL VISUAL STYLE

=====

BoostX should look like a premium modern SaaS platform.

- Use:
- Clean layouts
 - Large whitespace
 - Thin borders
 - Subtle shadows
 - Consistent spacing
 - Moderate corner radius
 - Strong typography
 - Minimal icons
 - Simple charts
 - Clear hierarchy

CARD RADIUS:
Use approximately 12px.

BUTTON RADIUS:
Use approximately 8px.

INPUT RADIUS:
Use approximately 8px.

Avoid:

- Excessive rounded cards
- Giant pill shapes everywhere
- Excessive shadows
- Glassmorphism
- Neon effects
- Gradients
- Colorful illustrations
- Unnecessary animations

=====

9. DESKTOP LAYOUT

=====

Create a fixed left sidebar.

Sidebar width:
Approximately 240–260px.

Main content:
Flexible width.

Top navigation:
Approximately 70–80px.

Desktop structure:

LEFT SIDEBAR

BOOSTX LOGO

Navigation:

- MAIN
- Dashboard
- New Order
- My Orders
- Services

FINANCE

- Wallet
- Transactions
- Payment History

TOOLS

- API
- Support

ACCOUNT

- Profile
- Settings

Bottom:

- Theme Switch
- Logout

Use monochrome icons.

Active navigation:
Black background + white text in Light Mode.

In Dark Mode:
White background + black text.

=====

10. BOOSTX LOGO

=====

Create an original BoostX wordmark.

Use:
BOOSTX

Logo should be minimal and modern.

Possible symbol:
A simple abstract X / boost arrow concept.

The logo must remain monochrome.

Light Mode:
Black logo.

Dark Mode:
White logo.

Do not copy the reference logo.

=====

11. TOP NAVIGATION

=====

Create:

Left:
Page title / breadcrumb

Center:
Search field:
"Search orders, services..."

Right:
Notification icon
Wallet balance
User avatar
User name
Dropdown

Example:

GHS 250.00

User:
Joseph

Keep everything monochrome.

=====

12. DASHBOARD

=====

Dashboard heading:

Good morning, Joseph

Subtitle:

"Manage your orders and social media growth from one place."

Primary CTA:

+ Create New Order

Then create four statistic cards.

CARD 1:

Total Orders

CARD 2:

Completed Orders

CARD 3:

Pending Orders

CARD 4:

Wallet Balance

Each card contains:

- Icon
- Label
- Large number
- Small comparison text
- Minimal chart/sparkline if appropriate

Use only grayscale.

=====

13. ORDER ANALYTICS

=====

Create a large card:

ORDER ACTIVITY

Show:

- Total Orders
- Completed
- Pending
- Processing

Line chart.

Time filters:

- 7 Days
- 30 Days
- 3 Months
- 6 Months
- 1 Year

Chart colors:

Light Mode:

- Black line
- Gray secondary line
- Light gray grid

Dark Mode:

- White line
- Gray secondary line
- Dark gray grid

No colored charts.

=====

14. QUICK ORDER

=====

Make "Create New Order" one of the most prominent features.

Order process:

- STEP 1
- Select Platform

Instagram
TikTok
YouTube
Facebook
X
Telegram

STEP 2
Select Service

Followers
Likes
Views
Comments
Shares
Saves
Engagement

STEP 3
Enter URL

STEP 4
Enter Quantity

STEP 5
Review Order

STEP 6
Payment

STEP 7
Order Confirmation

Make the entire process simple for first-time users.

=====

15. NEW ORDER PAGE

=====

Create a dedicated New Order page.

Header:
Create New Order

Platform selector.

Service selector.

Service description.

Target URL field.

Quantity field.

Show:

Minimum:
100

Maximum:
100,000

Price:
GHS 25.00

Estimated delivery:
10–30 minutes

Order summary:

Service
Quantity
Price

TOTAL:
GHS 25.00

Large button:

PLACE ORDER

Button:
Black in Light Mode.
White in Dark Mode.

=====

16. RECENT ORDERS

=====

Create:

Recent Orders

Table columns:

- Order ID
- Platform
- Service
- Quantity
- Price
- Status
- Date
- Action

Example:

#BX10245
Instagram
Followers
1,000
GHS 20.00
Completed
26 Sep 2026

Statuses should use grayscale only.

Completed:
Light gray background + black text.

Processing:
Medium gray background + black/white text depending on theme.

Pending:
Gray outline.

Cancelled:
Dark gray/neutral styling.

Never use green/red/orange.

=====

17. ORDERS PAGE

=====

Create a full order management page.

Features:

Search orders

- Filter:
- All
 - Pending
 - Processing
 - Completed
 - Cancelled
 - Partial

- Sort:
- Newest
 - Oldest
 - Highest Price
 - Lowest Price

Pagination.

Order details button.

=====

18. ORDER DETAILS

=====

Create detailed order tracking.

Show:

- Order ID
- Platform
- Service
- Target URL
- Quantity
- Start Count
- Current Count
- Remaining
- Price
- Created
- Updated
- Estimated Completion
- Status

Add progress bar.

Use black/gray only.

Actions:

- Cancel Order
- Reorder
- Contact Support

=====

19. SERVICES PAGE

=====

Create:

Services

Search services.

Filter by platform.

Service table:

Platform
Service
Description
Min
Max
Price / 1,000
Speed
Action

Example:

Instagram
Followers
High-quality followers
100
100,000
GHS 20.00
Fast

Each service should have:

View Details
Order Now

=====

20. WALLET

=====

Create a wallet page.

Main balance:

GHS 250.00

Cards:

Available Balance
Pending Balance
Total Deposited
Total Spent

Buttons:

- Add Funds
- Withdraw/Refund where applicable
- Transaction History

=====

21. PAYMENT PAGE

=====

Create a clean payment page.

Heading:

Add Funds

Amount:

GHS [_____]

Payment methods:

- Mobile Money
- Card
- Other available methods

Payment summary:

- Amount
- Fee
- Total

Example:

Amount:
GHS 100.00

Fee:
GHS 2.00

Total:

GHS 102.00

Button:

Continue Payment

=====

22. TRANSACTIONS

=====

Create transaction history.

Columns:

- Transaction ID
- Type
- Description
- Amount
- Payment Method
- Status
- Date

Filters:

- All
- Deposits
- Orders
- Refunds
- Payments

=====

23. API PAGE

=====

Create a professional developer API dashboard.

Sections:

- API Status
- API Key
- API Endpoint

Documentation

Buttons:

- Copy API Key
- Regenerate Key
- View Documentation

Include code examples.

Use a monochrome code editor style.

Do not use colorful syntax highlighting.

API functions:

- Create Order
- Get Order Status
- Get Balance
- List Services

=====

24. SUPPORT

=====

Create:

Support Center

Search:
"What can we help you with?"

FAQ categories.

Create Ticket.

Ticket fields:

- Subject
- Order ID
- Category

Message
Attachment

Button:

Submit Ticket

Ticket history:

Ticket ID
Subject
Status
Last Updated

=====

25. PROFILE

=====

Profile page:

Profile photo/avatar

Full Name
Email
Phone
Account ID

Buttons:

Edit Profile
Change Password

=====

26. SETTINGS

=====

Settings sections:

Account
Security
Notifications

- Appearance
- API
- Payment

Appearance:

- Light Mode
- Dark Mode

Notifications:

- Order Updates
- Payment Updates
- Promotions
- Security Alerts

=====

27. ADMIN DASHBOARD

=====

Create a separate Admin interface.

Admin sidebar:

- Dashboard
- Orders
- Users
- Services
- Payments
- Transactions
- Support
- API
- Reports
- Settings

Admin statistics:

- Total Users
- Total Orders
- Revenue
- Pending Orders

Completed Orders

Charts:

- Revenue
- Orders
- User Growth

Tables:

- Recent Orders
- Recent Users
- Recent Payments

Admin interface must use the exact same BoostX black-and-white design system.

=====

28. MOBILE DESIGN

=====

Create complete mobile versions.

Width:
390px reference frame.

Mobile sidebar becomes a slide-out drawer.

Top navigation:

- Menu
- BoostX
- Notifications

Dashboard cards become vertically stacked.

Tables become responsive cards or horizontal scrolling.

New Order becomes a one-column step-by-step process.

Buttons should be full-width where appropriate.

Bottom navigation may contain:

- Home
- Orders
- New Order
- Wallet
- Profile

Keep all colors exactly within the BoostX grayscale palette.

=====

29. TABLET DESIGN

=====

Create tablet layouts.

Use responsive grids.

Sidebar may collapse.

Cards should reorganize automatically.

Tables should remain usable.

=====

30. COMPONENT LIBRARY

=====

Create reusable components.

Components:

- Button
 - Primary Button
 - Secondary Button
 - Ghost Button
 - Danger-neutral Button

- Input
 - Search Input
 - Select

Dropdown
Textarea
Date Picker

Card
Statistic Card
Order Card
Service Card
Wallet Card

Table
Pagination
Tabs
Modal
Drawer
Toast
Notification
Tooltip
Badge
Avatar
Progress Bar
Chart
Sidebar
Navbar

Create component states:

Default
Hover
Focus
Active
Disabled
Loading
Error
Success

=====

31. BUTTON RULES

=====

LIGHT MODE:

Primary:
Background #000000
Text #FFFFFF

Hover:
Background #262626

Secondary:
Background #FFFFFF
Text #000000
Border #D4D4D4

DARK MODE:

Primary:
Background #FFFFFF
Text #000000

Hover:
Background #E5E5E5

Secondary:
Background #111111
Text #FFFFFF
Border #404040

Never use colorful buttons.

=====

32. INPUT RULES

=====

Light Mode:

Background:
#FFFFFF

Border:
#D4D4D4

Text:
#111111

Placeholder:
#A3A3A3

Focus border:
#000000

Dark Mode:

Background:
#111111

Border:
#404040

Text:
#FFFFFF

Placeholder:
#737373

Focus border:
#FFFFFF

=====

33. CARD RULES

=====

LIGHT MODE:

Background:
#FFFFFF

Border:
#E5E5E5

Shadow:
Very subtle black shadow with low opacity.

DARK MODE:

Background:
#0A0A0A

Border:
#262626

Shadow:
Minimal or none.

Cards should never have colored backgrounds.

=====

34. ICON RULES

=====

Use one consistent icon family.

Preferred:
Lucide-style icons.

- Icons must be:
- Black in Light Mode
 - White/gray in Dark Mode

No colorful icons.

=====

35. CHART RULES

=====

Charts must remain monochrome.

Light Mode:
Black
Gray
Light gray

Dark Mode:
White

Gray
Dark gray

No colorful charts.

=====

36. EMPTY STATES

=====

Create professional empty states.

Example:

"No orders yet"

"Your orders will appear here once you place your first order."

Button:

Create New Order

Use simple monochrome illustration/icon only.

=====

37. LOADING STATES

=====

Create skeleton loaders.

Use:

Light Mode:
#E5E5E5
#F5F5F5

Dark Mode:
#262626
#171717

No colored loading indicators.

=====

38. ERROR STATES

=====

Errors must NOT use red.

Use neutral grayscale.

Example:

"Something went wrong"

"Please try again."

Button:

Try Again

Use black/gray styling.

=====

39. NOTIFICATION SYSTEM

=====

Create notifications for:

Order placed

Order processing

Order completed

Payment successful

Payment failed

Account security

Support response

Use grayscale notification cards.

=====

40. SPACING SYSTEM

=====

Use a consistent 4px-based spacing system.

4px
8px
12px
16px
20px
24px
32px
40px
48px
64px

Avoid inconsistent spacing.

=====

41. RESPONSIVE BREAKPOINTS

=====

Mobile:
320–767px

Tablet:
768–1023px

Desktop:
1024px+

Large desktop:
1440px+

The design must scale naturally.

=====

42. ACCESSIBILITY

=====

Maintain strong contrast.

Buttons must be easy to identify.

Inputs must have clear labels.

Icons should not be the only way to understand an action.

Use readable font sizes.

Maintain keyboard-friendly focus states.

=====

43. OVERALL USER FLOW

=====

The main customer journey should be:

Make this journey visually obvious.

=====

44. FINAL VISUAL REQUIREMENT

=====

The final BoostX product must look like:

A premium black-and-white SaaS platform.

It should feel:

- Professional
- Modern
- Minimal
- Fast
- Trustworthy
- Clean
- Simple
- Easy to use
- Production-ready

The reference image provides the structural inspiration only.

BOOSTX MUST HAVE ITS OWN ORIGINAL IDENTITY.

ABSOLUTE FINAL COLOR RULE:

ONLY USE:

#000000

#050505

#0A0A0A

#111111

#171717

#1F1F1F

#262626

#404040

#525252

#737373

#A3A3A3

#D4D4D4

#E5E5E5

#F5F5F5

#FAFAFA

#FFFFFF

NO OTHER COLORS.

Create both:

1. COMPLETE LIGHT MODE
2. COMPLETE DARK MODE

Make sure every screen, component, state, chart, button, icon, table, modal, notification, form and navigation element follows this exact color system.

One important thing

For the **BoostX design**, I would specifically tell Figma that **Light Mode and Dark Mode should be opposites in emphasis**, rather than simply changing the background.

Light Mode

White cards
Very light-gray page background
Black primary buttons
Black active sidebar
Black charts
Dark text

Dark Mode

Almost-black page background
Near-black cards
White primary buttons
White active sidebar
White charts
White primary text
